Log Homes of Yellowstone

Description

As part of our heritage at Log Homes of Yellowstone, we build dream homes. This hand-crafted home speaks to the history of log homes through modern wood working, custom interior and exterior finishes, custom trim work, one of a kind handmade furnishings and inspiring floor plans. Each and every home built by Log Homes of Yellowstone features unparalleled craftsmanship. The owner of this home is the founder of Log Homes of Yellowstone. It's no secret that he has placed his own personal touches on the construction of this beautiful, moderately sized lodge estate. Situated on a fully usable five and a half acre lot, the front of this home has a gentle slope with serene night lighting and a peacefully sedating slate waterfall and koi pond that represents the beauty of the Blue Ridge Mountains. With over a decade of experience in Solar and Geothermal systems, this southern facing home was built with ultimate energy efficiency in mind. Log Homes of Yellowstone also specializes in fossil countertops and wall decor.

This is truly a lodge estate right in the heart of Fannin County, where the mountains touch the sky and the streams are never ending. This home exhibits extreme care and concern for the minute details seen throughout. Signature circular sawn pine flooring, all wood interior built with dexterity using walnut wood for the greatest amount of cabinetry imaginable in a lodge estate. You will find your dreams fulfilled in this home and the gateway to your memories. Melt away while relaxing in the deep copper tub, and drawing your bath from the natural stone waterfall. You can imagine how serene it is to watch the flickering of the gilded fireplace in the master bath.

Directions

From Hwy 515 turn on Cook St.(next to Burger King) Go through 1st traffic light and turn left on Ada St. Travel approx. 1.5 miles to Lonesome Dove Tr. on right. Turn right and follow signs to home.
