### Description

The "Summit View" is a spacious 2,455 square foot Satterwhite Log Home situated at the end of the road on Mountaintown River. With 1,200 square feet of porch, it is a great place to kick back and listen to the river. Built for relaxation, the Summit View has an open floor plan with master suite on the main. Like all Satterwhite Homes, it features dry logs from the Colorado and Utah Rockies. Spruce logs, Aspen ceilings, Blue Ponderosa Pine and Heart Pine make this home a wood lover's dream! 3 bedrooms, 3 ½ baths and 2 living rooms on 3 levels give you and your group plenty of space to spread out or gather up in front of the see-thru fireplace in the main level living room or on the gable porch overlooking the river. Whether you're looking to trout fish or just relax by the water, step out of the terrace level and walk a few steps to the fast-running river. Beautiful woods and water views from all three levels. This is log home living at its finest!
